BSCS-V-E **Web Engineering**

Homework - Task 1: Semantic teardown

Take a screenshot of any real homepage (e.g. a news site or your college site). Draw boxes around the header, nav, main, article, aside, and footer regions and label each one. Save the annotated image and submit it separately alongside this document.

Homework - Task 2: Fix bad HTML

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8"/>
    <title>My Blog</title>
</head>
<body>
    <header>
        <h1>My Blog</h1>
        <nav>
            <a href="/">Home</a>
        </nav>
    </header>
    <main>
        <article>
            <h2>First Post</h2>
            <p>Hello world</p>
            <p><time datetime="2026-08-09">Aug 9 2026</time></p>
        </article>
    </main>
</body>
</html>
```

Output

Homework - Task 3: Second page (contact.html)

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8"/>
    <title>Contact - Abdul Manan</title>
</head>
<body>
    <header>
        <h1>Abdul Manan</h1>
        <nav>
            <ul>
                <li><a href="profile.html">Home</a></li>
                <li><a href="contact.html">Contact</a></li>
            </ul>
        </nav>
    </header>
    <main>
        <form action="#" method="post">
            <div>
                <label for="name">Full name</label>
                <input type="text" id="name" name="name" required/>
            </div>
            <div>
                <label for="email">Email</label>
                <input type="email" id="email" name="email" required/>
            </div>
            <div>
                <label for="message">Message</label>
```

```
                <textarea id="message" name="message" rows="4"></textarea>
            </div>
            <button type="submit">Send</button>
        </form>
    </main>
    <footer>
        <p>&copy; 2026 Abdul Manan. All rights reserved.</p>
    </footer>
</body>
</html>
```

Output

Homework - Task 4: Reflect

[Fill in, max 5 sentences] Where in profile.html or contact.html did you almost reach for a and what semantic element did you use instead? For example: I almost wrapped the skills list in a , but used <section id="skills"> instead since it's a thematic group with its own heading.
